DESCRIPTION

Title: Feedboxes

PRESENTATION HISTORY

So far the Feedboxes were only presented online on Vimeo page with over 2500 views and on Create Digital Music blog.

ENVISIONED INTERACTION

Feedboxes are placed on a table; the demo might consist of a short description followed by an improvised piece with feedboxes, trumpet and voice, playing and singing to microphone of one of the Feedboxes, and manipulating their positions to create feedback loops. The boxes could also be freely interacted with by audience members, with my supervision and advice.

TECHNICAL REQUIREMENTS

- Tall table about 1x1 m. (provided by NIME)
- Depending on the size of the room/venue, small PA system and 1-2 condenser microphones might be necessary (provided by NIME). For smaller rooms, volume of Feedboxes themselves might be sufficient.

EQUIPMENT

- Feedboxes – two wireless boxes with a speaker and microphone (provided by me).
- Pocket trumpet (provided by me).

TIMING

The demo, consisting of a verbal description and improvised performance, might take from 15 to 30 minutes. There might be also some time left for audience members to test and play with Feedboxes.

RADIO FREQUENCIES

Feedboxes use standard smartphones, but they're connected neither to gsm, nor to wifi network.

POWER

230v power socket for charging.

SAFETY

No safety hazards.
